Art Unit: 2834

Claims 1-14 are rejected under 35 USC 103 as unpatentable over Lee, Frisch or Goldenberg in view of Ogawa, Echols or Klein Schmidt for the specific reasons set forth in the prior office in the prior office action (2-7-03).

Regarding applicants comments it is noted that Goldenberg explicitly teaches a stop: see e.g. col. 3, ln 49-col. 4 ln. 5.

It is noted that "the charge redistribution device operable --- due to the temperature change --- to relieve --- due to temperature induced deformation ---" is merely a statement of desired function which adds no structure to the combination claimed. Each of Ogawa, Kleinschmidt and Echols clearly and explicitly provide motivation for providing a charge dissipation means for a piezoelectric device subjected to pyroelectric effects caused by the change in ambient temperature.

Claims 15-23 are allowed.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however,
